

Figure 1: Flow cytometric determination of the expression of APN (CD13) and DP IV (CD26) on fibroblasts

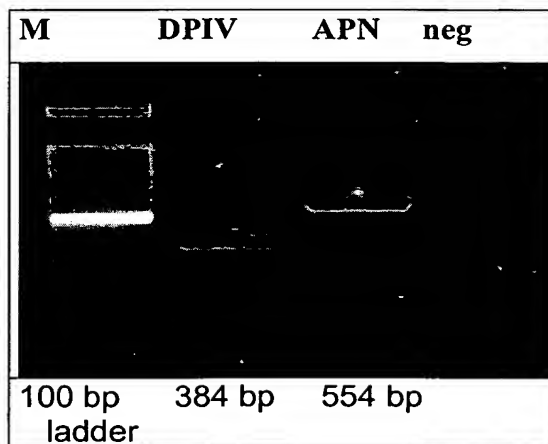

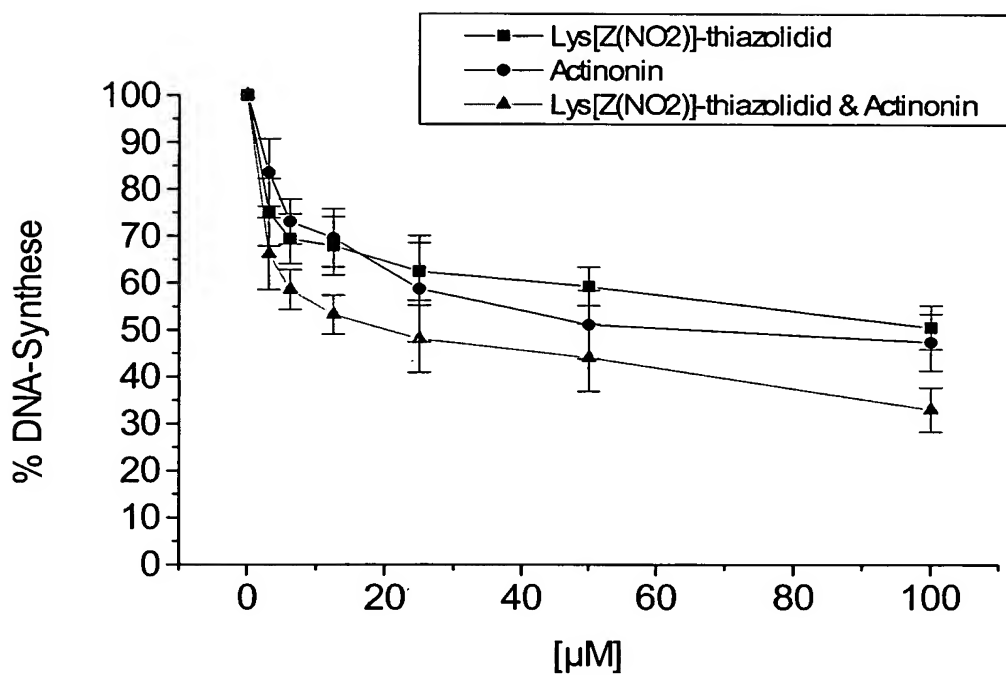

Figure 2: Determination of the mRNA expression of DP IV (CD26) and APN (CD13) on fibroblasts by means of RT-PCR

Figur 3: Dose-dependent effect of inhibitors of DP IV (Lys[Z(NO₂)]-thiazolidide) and of aminopeptidase N (Actinonine) on the DNA synthesis of human fibroblasts.
